DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to due to the use of legal phraseology (i.e. device) on line 1. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,2,4-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Mullick.

Mullick shows all of the basic device including a shower device having a first region 12, second 11, porting region 14, third region 15, tube above 33a with inlet above, solution apparatus 30, point of dispersal 18, and reservoir with aperture. In regard to claim 14, the first region is 11, the porting region is 14, and the second region is 15.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mullick.

Art Unit: 3752

Mullick shows all of the basic device except for the second region being conical. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Mullick device to have the second region conical in shape since the shape would depend on the desired spray pattern desired (i.e. the force applied to the water).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Response to Arguments

7. Applicant's arguments filed June 17, 2002 have been fully considered but they are not persuasive.

In response to applicant's argument that the limitation of "the inlet positioned after the third region receives the water from the porting region" applicant's attention is drawn to figure 1 of Mullick.
